**Product Advantages**

The machine body uses stove paint technology which has good surface finish, strong corrosion resistance, easy to scrub and paint is not easy to fall off. The paint on the machine body, surface gloss, easy to clean, corrosion resistance is stronger, paint is not easy to fall off.

The clearance between the mixing hook and the wall of the mixing bowl is 0.6mm, and the gap between the mixing hook and the bottom of the mixing bowl is 0.23mm. It can increase the moisture content by 6% compared with the current market. The higher the moisture content, the softer the bread and the better the taste.

The dough mixer has two speeds, no downtime is required for the speed change, control panel automatically controls the transition time between fast and slow switching.

What are the advantages of bowl-lifting spiral dough mixer? Save huge manpower and reduce labor costs.
